REPORT

One Week National Level Faculty Development Programme on "Joomla" was successfully conducted by Don Bosco College Central Library and Dept. of Computer Science, Manipur University, Imphal in association with course materials provided by Spoken Tutorial, IIT Bombay (An Initiative of National Mission on Education through ICT, MHRD, Govt. of India) from 1st-5th June, 2020. The programme was coordinated by Mr. Sur Chandra Singha, Librarian of Don Bosco College, Itanagar, Arunachal Pradesh and Dr. Th. Rupachandra Singh, Assistant Professor, Department of Computer Science Manipur University, Imphal under the guidance and initiative taken by Fr. (Dr.) Jose George, Principal of Don Bosco College, Itanagar, Arunachal Pradesh. The One Week National Level Faculty Development Programme on "Joomla" received an overwhelming response with 1387 participants. The Spoken Tutorial project is the initiative of the 'Talk to a Teacher' activity of the National Mission on Education through Information and Communication Technology (ICT), launched by the Ministry of Human Resources and Development, Government of India and developed by IIT Bombay.

About the Spoken Tutorial project

- Self explanatory - uses simple language
- Audio-video - uses multisensory approach
- Small duration - has better retention
- Learner-centered - learn at your own pace
- Learning by doing - learn and practice
- Simultaneous empowerment - learn a new FLOSS

Target Audience

- People interested in developing their own websites

Workshop

The Spoken Tutorial Project Team conducts workshops on Joomla and other FLOSS using spoken tutorials and gives certificates to those who pass an online test.

Introduction

- Joomla is a popular Content Management System (CMS).
- It is free, Libre and open source software.
- It is used to manage the content of a website. It lets a user create, edit, modify and remove content from a website without knowing programming skills.
- It is used by many corporates, educational institutes, eCommerce companies to create and maintain their website.

Download and Installation

Prerequisites for installing Joomla:

- To install Joomla 3.4.1, the machine should support:
 - Apache 2.x + or IIS 7 +
 - MySQL 5.0.4 + and
 - PHP 5.2.4 +
- Start XAMPP service
- Add user and create a database for Joomla using phpMyadmin

Installing Joomla on Local Server:

Download Joomla from

<https://downloads.joomla.org>

Features

- Joomla works on Linux, Windows and Mac operating systems
- Joomla is easy to navigate on all devices
- Joomla has a 3-tiered system of articles which makes organizing content very user-friendly
- Joomla has a built-in registration system that allows users to configure personal options
- Joomla support multiple authentication protocols, including LDAP, OpenID, and even Google mail The security controls keep our data safe and protected
- The Joomla user community and forum very active and helpful
- Free plugins available in Joomla make it feature-rich
- Joomla's search feature helps navigate users to most popular search items and provide the admin with search statistics
- Joomla's RSS features allows users to subscribe to new content in their favorite RSS reader
- Joomla admin can use templates to make the site look exactly the way they want
- This can be done using a single template for the entire site or a separate template for each site section.

Who can use Joomla CMS?

- Corporates to make their website
- Educational institutions
- Media houses
- Ecommerce websites
